

### **RITA-T Cut-off Score Summary**

The RITA-T is an interactive Autism Screening Test for 18 months- 36 months old.

It is comprised of nine interactive presses that assess developmental constructs delayed in ASD. The scoring range is from 0-30. The lower the score, the more typical the response.

The RITA-T has clear cut-off scores that have been consistent with excellent psychometrics replicated in multiple samples and settings.

#### **Cut-off Scores:**

**< 12:** Low-risk for ASD

**12-16:** Medium-risk for ASD

**>16:** High risk for ASD

**Always use clinical judgement and impressions in final referral.**
