

## Pediatric Narcolepsy Patient Reported Outcomes Scale

Help us improve pediatric narcolepsy care and receive \$50!

*Currently there is no clinical tool to assess the broad symptoms of pediatric narcolepsy and their impact on daily functioning. We are a group of researchers from different academic hospitals (Boston Children's Hospital, Stanford University, Geisinger Medical Center, The Hospital for Sick Children, and National Jewish Health) testing a pediatric narcolepsy patient reported outcomes tool to assess pediatric narcolepsy symptoms and their effect on daily functioning and quality of life. Our goal is to develop a clinical survey that can improve the care of pediatric narcolepsy.*

### WHO IS ELIGIBLE?

- ❖ Children and adolescents with narcolepsy between the ages of **9-17 years**
- ❖ Narcolepsy diagnosis must be verified by a signed letter from physician in order to participate
- ❖ Participants must be able to understand the purpose of the study

### PARTICIPATION DETAILS

- ❖ If you sign up you will receive an email containing a link to complete HIPAA compliant online surveys about narcolepsy symptoms, quality of life, and daily function. Participation should take no more than 30 minutes.
- ❖ One week later, some participants will receive another email with a link to complete a 10-minute follow up survey
- ❖ As a thank you for completing all surveys, we will send you a \$50 gift card

### INTERESTED?

If you would like more about the study or are interested in participating please call the **Neurology Sleep Research** team at **617-919-212** or email us at [NeuroSleepResearch-dl@childrens.harvard.edu](mailto:NeuroSleepResearch-dl@childrens.harvard.edu)
